## ABOUT

Technology leader with a multidisciplinary background spanning IT Governance, Cybersecurity Compliance, iOS Product Engineering, and Project Management. Seeking senior-level opportunities where technical depth, governance expertise, and structured delivery can drive secure, scalable, and business-aligned solutions within a collaborative and high-performance environment.

## PROFESSIONAL EXPERIENCE

### ADREE/MASTER WORKS | FULL-TIME

#### IT Governance Senior Specialist

RIYADH, SA

Aug 2025 – Present

- NHC (National Housing Company)
  - IT Department Policies – Led the drafting, review, alignment, and approval support of multiple IT department policies in coordination with cross-functional stakeholders.
  - Cybersecurity Controls – Managed IT-driven implementation and compliance activities aligned with cybersecurity policies, NCA-ECC controls, and enterprise risk assessment requirements.
  - Internal Audits – Managed remediation follow-ups, prepared and validated supporting evidence, and coordinated with relevant teams to resolve audit findings.
  - External Audit – Reviewed audit requirements and prepared, validated, and submitted required supporting documentation.
  - Critical Application Audits – Coordinated with application owners to review, validate, and submit audit evidence for business-critical systems.
  - Represented the IT Department in the annual **Business Continuity Plan (BCP)** review, verifying implemented controls and updating required documentation.
  - Contributed to drafting and enhancing departmental processes in collaboration with stakeholders to strengthen governance and operational alignment.

### THE LENDING HUB | FULL-TIME

#### Senior iOS Development

RIYADH, SA

Dec 2024 – Aug 2025

- iOS App Product Owner (from migration to delivery)
  - Re-engineered a full crowdfunding application by migrating from UIKit to SwiftUI, improving maintainability, reducing boilerplate, and modernizing the UI.
  - Designed the application using MVVM architecture and applied SOLID principles where possible, ensuring clear separation of concerns and improved scalability.
  - Implemented secure authentication flows including multi-factor authentication (PIN + OTP), biometric login, and NAFATH integration (socket-based identity verification).
  - Managed multi-environment builds (Development, Staging, Production) with scheme-based configuration and GitHub branching strategy.
  - Authored a comprehensive 17-section technical handover document, including architecture, integrations, error handling, and future improvement roadmap

### FUTURE ARROW TECH. (LUGMETY) | FULL-TIME

#### Project Management / iOS Development

RIYADH, SA

Nov 2023 – Mar 2024

- Managed and coordinated a portfolio of twenty projects for a seamless transition from the previous project manager, and initiated the launch of five new projects aligned with strategic organizational goals.
- Actively engaged with more than fifteen vendors and service providers to monitor and update project progress.
- Utilizing PRINCE2 methodology, introduced a new reporting format for enhancing data clarity and decision-making.

- Maintain, improve, and implement changes for three iOS Applications.

#### **EASTERN PROVINCE CEMENT Co. (EPCCO) | FULL-TIME**

##### **IT Compliance Officer (GRC) / ISO 27001 Lead Implementer**

**DAMMAM, SA**

**Dec 2014 – Nov 2023**

- Primary contact for all NCA requirements and audits, managing annual audits and monthly follow ups.
- Led a team of five engineers in verifying NCA-ECC technical requirements across five cybersecurity domains, successfully documenting findings in provided forms and reports. Additionally, devised a correction plan for missing controls in coordination with upper management, ensuring compliance and enhancing security measures.
- ISO 27001 Lead Implementer, overseeing the creation of key documents such as policies, procedures, and standards, alongside the establishment and maintenance of the risk and asset registers.
- Led meetings with a consulting team to ensure the accurate implementation of controls and the alignment of documentation with ISO 27001 requirements, reinforcing security measures and operational integrity.
- Directed the ARAMCO-CCC implementation across two sites, overseeing the production of three audit reports and managing two renewal processes.

#### **Additional Roles and Responsibilities**

- Designed, Customized, and executed annual training plans for three-hundred users, gaining approval from relevant stakeholders. Initiated virtual training programs through a Learning Management System (LMS), reported progress to department managers, and regularly conducted phishing campaigns to monitor and enhance cybersecurity awareness.
- Main department contact for multiple projects, organizing meetings and setting automated workflows to streamline project management processes.
- Domain Controller architect configuring Group Policy and managing users and devices. Additionally, took an administrative role in managing security and patch management applications, implementing policies, monitoring for abnormalities, ensuring compliance, and generating comprehensive reports.
